

## **MODERNISATION OF LABS**

For the modernisation of Labs, the Vidyalaya has received various modern equipments, experiment equipments and devices from KVS headquarter. All the devices have been installed and displayed for the students. Due to unavailability of regular PGT Physics, Chemistry and Biology teachers and lack of training and knowledge of use of these devices, most of the instruments are not been used for conducting practical or teaching learning process. However, the students of different classes from VI to XII are been taken to lab for observing the modern equipments.
